```

Analysis/Critique

1. Efficacy in simulation2real
2. Fairness
3. SBDRL
4. Usefulness for Abstract Visual Reasoning

Applications

1. Better generative models
2. Behavioral representations
3. Multi-mapping *Image-to-image translation*
4. Flow-based *Image-to-image translation*
5. Audit indirect influence in model predictions
6. Person Re-identification
7. Recommendation systems
8. (Spatial VAE)
